# Introduction

For the past 15 years our management team have operated in the Caspian Sea. From the first day we opened to the present day two words have driven and shaped our business and those words are Quality and Pride.

**QUALITY** .... We always insist on the best possible products for our clients. Over the years, this has allowed us to establish strong relations with some of the best quality manufacturers in the lifting, marine and mooring industries.

As a result of this, our clients know we strive for quality and have the reassurance that all our products have been designed, manufactured and certified to the highest marine and offshore industry standards. These suppliers and their products are of significant importance to our daily operations.

**PRIDE** .... We always pride ourselves in the quality of services and products we deliver to all our clients. Regardless of the size of order, the same pride is taken by our staff to ensure we deliver the exact product or service to our clients within the delivery time agreed.

We are firm believers of the old adage "you are only as good as your last job" and we ensure all our sales, production and quality personnel implement our high quality internal procedures for every single order, as not only does practice make perfect, it also makes permanence!!

We now have service centres in Azerbaijan, Kazakhstan and the United Arab Emirates. All operate to the same standards and offer our clients a broad range of quality products and services specific to the local industry requirements.

To our existing clients we say thank you for supporting us over these many years as you have helped to forge our strong work ethic by providing us with the chance to support your operations.

To our potential new clients we look forward to being of assistance to you in the future.

The Rigmarine Team.

# Lifting

Lifting is one of our key disciplines at Rigmarine and this is where all aspects of our business come together.

Quality products - we only supply products from the world's leading manufacturers.

Competent and highly trained personnel - lifting gear is a critical component that must be manufactured and certified to industry standards.

Service - delivery must be made on time, as we are aware that the smallest lifting component could be key to the timely completion of one of our client's multi-million dollar projects.

Safety - there cannot be room for error and the safety of our staff and our client's personnel and infrastructure are foremost in our minds.

- Wire rope sling manufacture from 1.5mm to 102mm dia.
- Rigging hardware.
- Specialist heavy lift rigging.
- Specialist subsea rigging.
- Rigging lofts.

To support our lifting equipment products, we also offer a range of specific lifting services such as:

- Lift planning and Management.
- Qualified rigging teams.
- Site competent personnel and technical authority.
- LOLER periodic surveys.
- Technical and compliance audits.
- Installation Service.

# Mooring & Marine

Via our Caspian and UAE service centres we offer our clients a substantial range of marine products available on a sale or rental basis, all of which can be installed, refurbished and recertified by our highly trained technicians.

In recent years, Rigmarine have provided several deep water mooring and chaser systems to operators in the Caspian and Middle East regions. In addition Rigmarine have a number of supply and service contracts with several AHTS and Tug owners and operators resulting in a variety of stock to meet our client's operational demands.

The provision of mooring, towing and miscellaneous marine equipment is a daily occurrence at Rigmarine and our product lines include, but not limited to:

- Anchors – HHP Delta Flipper, Stevpris, Stevshark & standard stockless type.
- Chain – Open & stud link, in U2, U3 & offshore grades.
- Buoys – polyethylene, steel and foam filled.
- Deck equipment – fairleads, panama & bulwark chocks, sheaves, bollards, smit brackets.
- Fendering – Extruded D section, pneumatic & foam filled.
- Mooring components – shackles, triplates, swivels, kenters, pear links.
- Wire Rope – tow & anchor lines, bridles and slings.
- Synthetic rope.

# Winches & Power lifting

Rigmarine's hydraulic and electric powered winch building capabilities are at the forefront of industry requirements. From specialist constant tension, deck utility and mooring winches, Rigmarine not only have the ability to provide our clients with an excellent product but also to deliver a complete package including service, recertification and skilled operators.

Our facility – 4000 sq mtr, with 150 state of the art machining and CNC machines.

Our R&D – Over 50 specialist engineers covering every aspect of winching technology.

Our Quality – operating to a full ISO 9001-2000 QMS with accreditations from all major Class societies inc DNV, ABS and LRCS.

As an authorised distributor and service centre for San-Ei of Japan, we also offer high quality pneumatic powered winches and hoists.

The range and quality of our products have so far been of service to our clients in the following industries:

- Oil and Gas.
- Engineering.
- Marine.
- Shipbuilding.
- Subsea.
- Tele communications.
- Lifting.
- Mining.

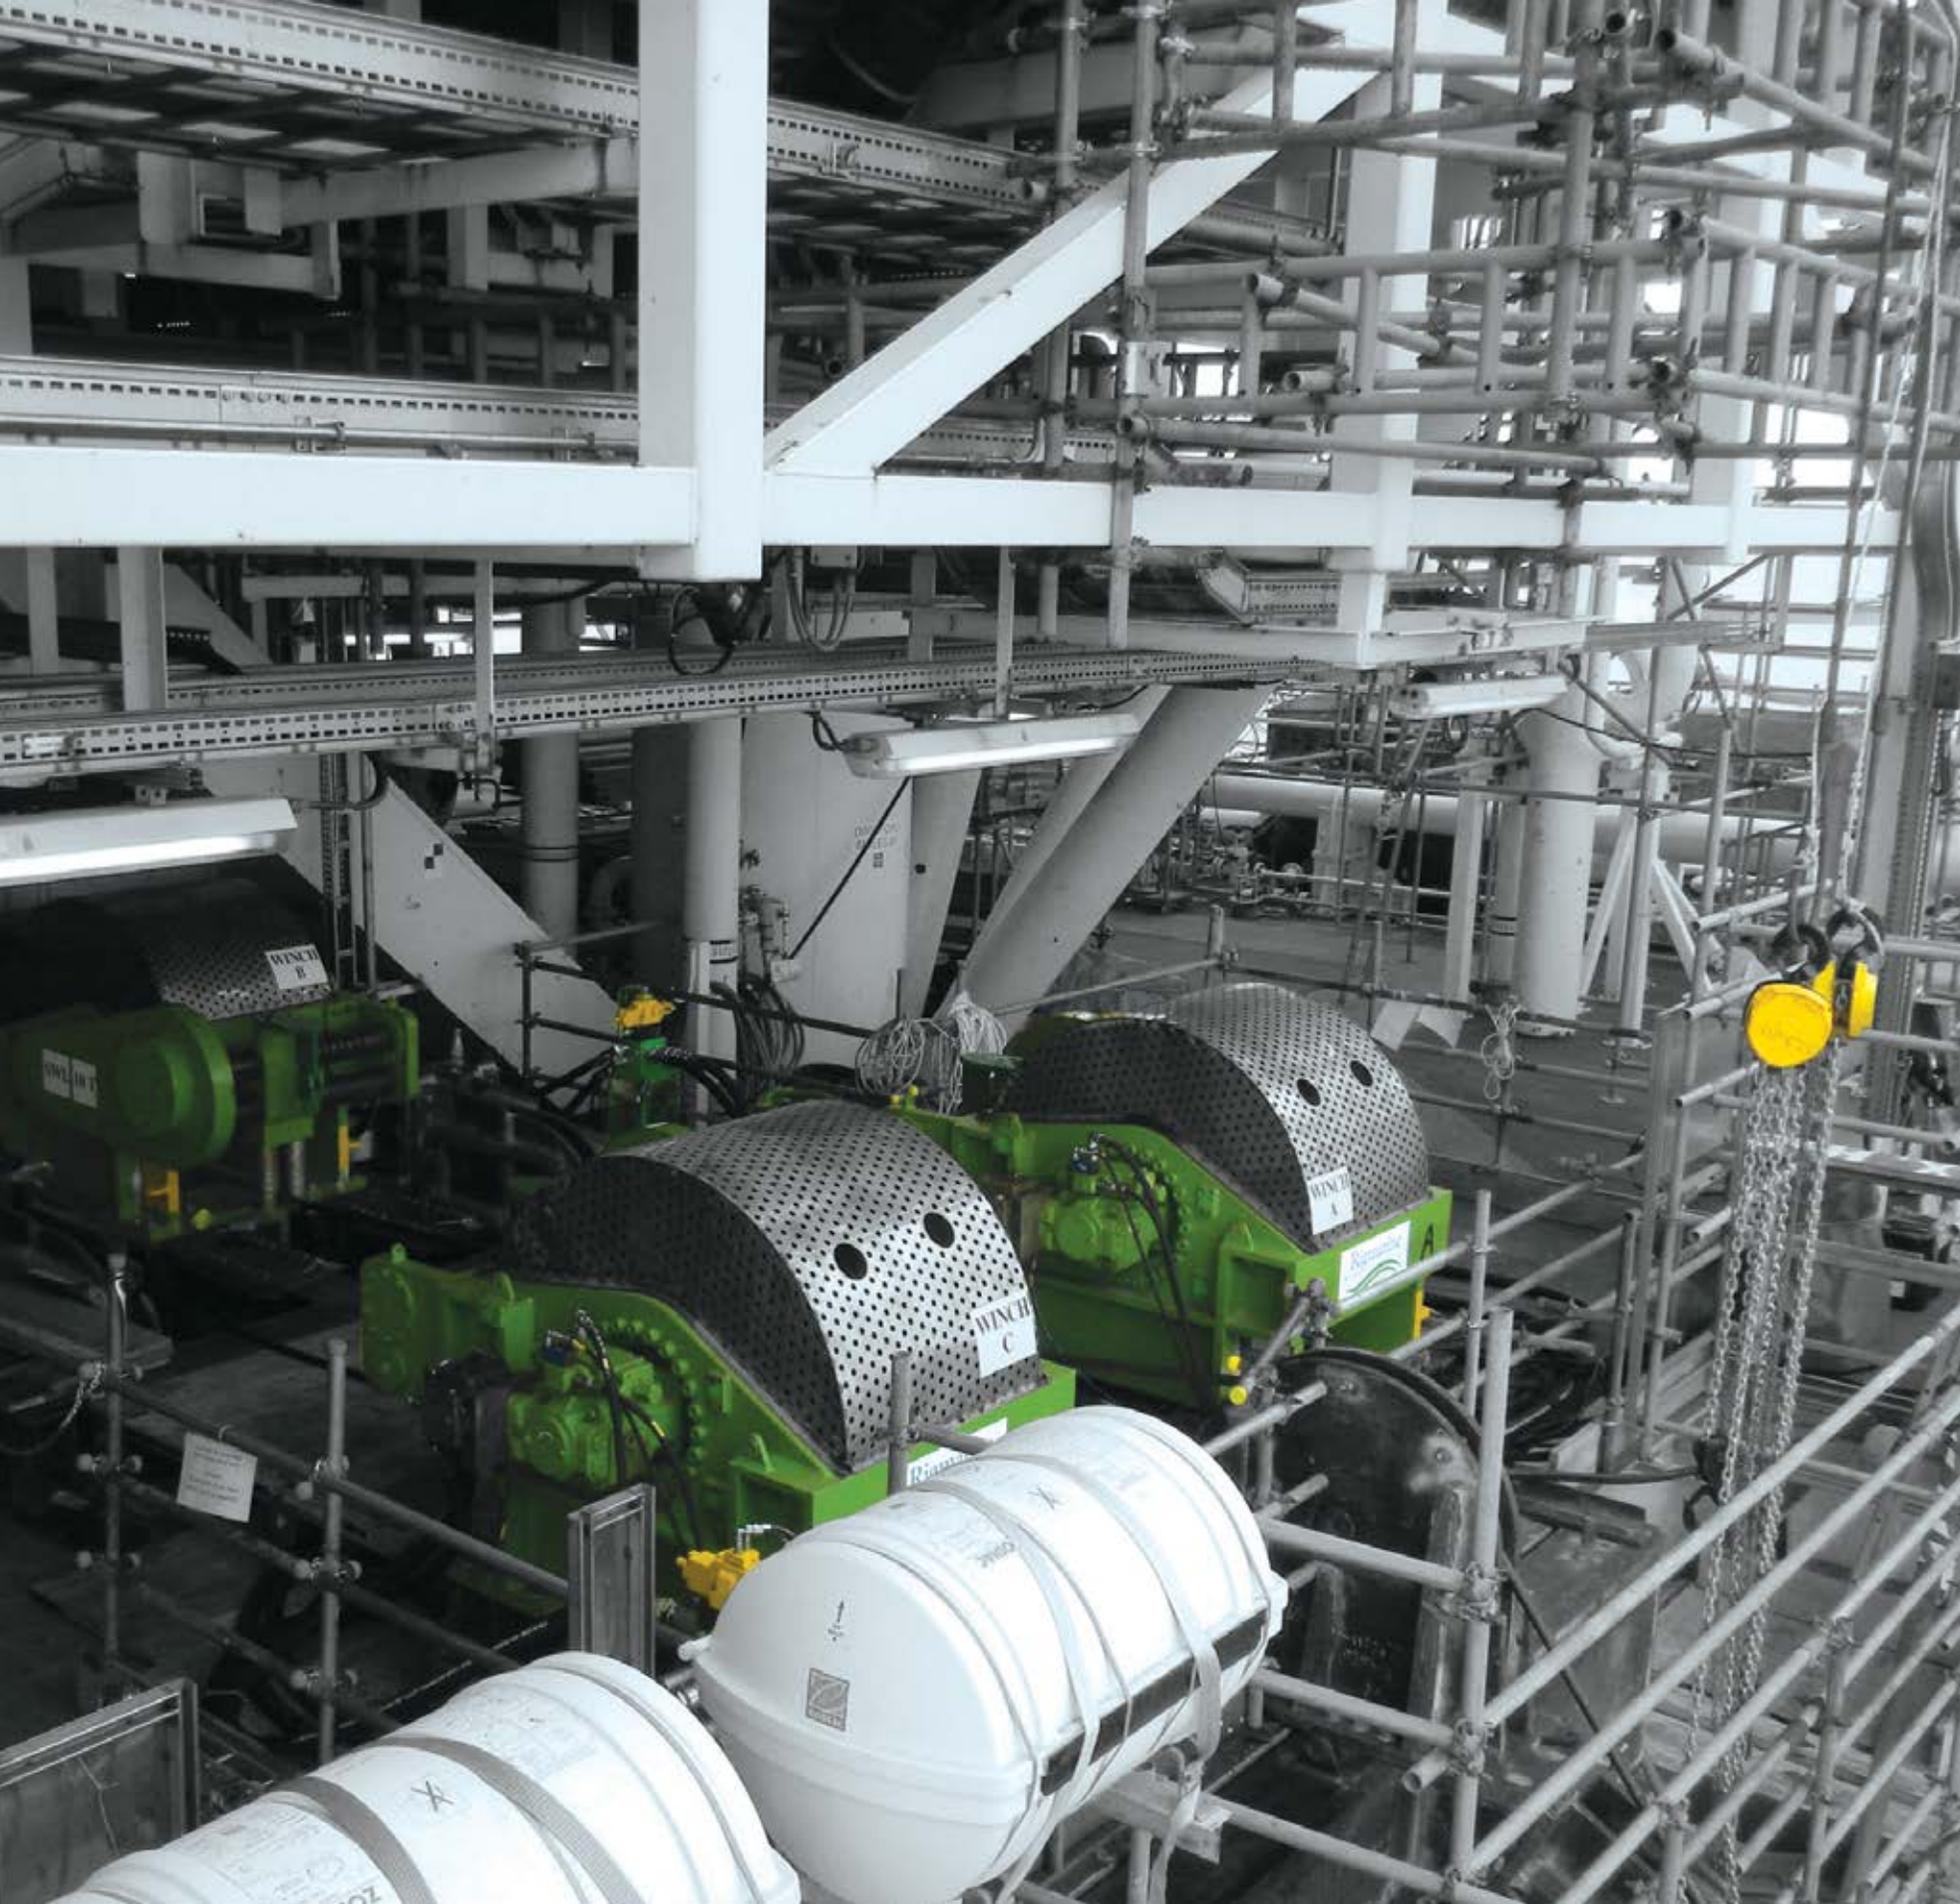

A selection of our most recent projects include:

- 40t Hydraulic constant tension lifting winches for subsea deployment.
- Compact 32t hydraulic lifting winches with planetary gear boxes.
- 35t Temporary barge mooring winches for quay side load out.
- 10t Back tensioned wire spooling machine for crane wire installation.

- 18t and 25t Barge mooring winches for offshore construction projects.
- 200t Back tension spooling unit for complete heavy lift crane barge commissioning.

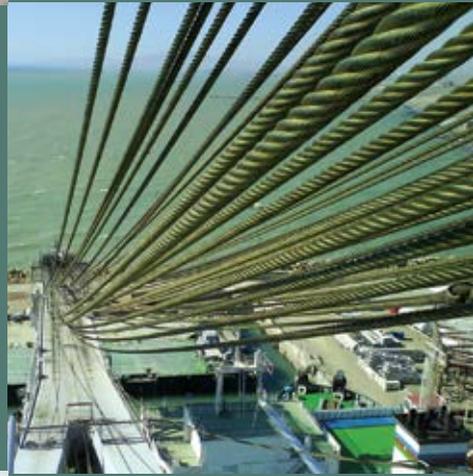

# Services

Rigmarine are committed to delivering an unrivalled range of marine and lifting services to our clients 365 days per year.

Our investment in personnel and plant is a continuous process and our service centres are all fully equipped to meet our client's operational needs.

## Services include but are not limited to:

- Load testing and certification.
- Wire rope installations and spooling services up to 250t capacity.
- Wire rope lubrication and NDT.
- Water bag and loadcell rentals.
- NDT services.
- Rigging loft provision and management.
- Module weighing and CoG surveys.
- Mooring system design and analysis.
- Wire rope socketing.

# Training

In addition to the investment in our supply and service disciplines Rigmarine have made a significant commitment to training both our own employees and those of our clients.

Unlike other training establishments it was decided that practical training needed to be more in-depth, as although theory is necessary, practical hands-on experience is invaluable.

Our extensive knowledge and experience of the lifting sector has provided us with an unparalleled ability to deliver comprehensive and effective training courses to the industry. With more than 50 accredited and individually tailored courses in the field of lifting equipment and lifting operations, we can ensure both our own and our client employees meet the desired competency levels.

In addition, we offer a full range of health and safety management programs, underpinned by industry recognized authorities such as NEBOSH and IOSH.

With the opening of our new custom built facility in the Caspian, which includes over 10 modern learning rooms & external practical rigging areas, we have again demonstrated our commitment to our employees, our clients and above all else to the Industry.

## Courses include :

### Rigging and lifting

- Banksman Slinger.
- Rigging and Lifting.
- Crane Operator.
- LOLER appointed person.
- Rigging loft management.
- Wire rope socketing.
- Wire rope examination.

## Health and Safety Management

- Confined space entry.
- COSHH assessor.
- Energy isolation.
- Area authority.
- IOSH managing safely.
- NEBOSH IGC.

# QA/QC

Viewed by our Directors as the original key business objective "QUALITY" has been a fundamental foundation stone of the company's growth and we are relentless in our goal to sustain and strive for improvement within our Quality System.

Our Quality Policy is simple and that is to exceed the expectations of our clients and the demands of our industry. Implemented across all Rigmarine locations is an active ISO 9001 Quality Management System which is accredited by one of the leading classification societies.

Our internal training structure is one of the best in the industry and provides us with a platform to educate all our personnel in the Quality culture of our organisation and also ensures every one of our team are fully competent in their chosen discipline.

Rigmarine are proud to be associated with the following organizations.
