

Lifting Operations Training & Competence Workshop

Competence is the ability to consistently perform activities to a defined standard of efficiency and safety. It is a combination of knowledge, ability, attitude and behaviour; derived from training and experience, and is verified through assessment and supervision.

All companies need competent employees to ensure that they can perform their activities correctly and safely under all working conditions.

With this in mind, Rigmarine would like to invite you to a lifting operations competence workshop at the Crescent Beach Hotel, Salyan Highway, Shikh Settlement, Baku, Azerbaijan.

The workshop is designed, through presentation and attendee input, to clarify why we need competent personnel. It will also address issues such as selecting the right people, achieving industry accepted competence levels in lifting operations, reviewing available training and competence awards and structuring your own competence assurance system.

Following the workshop there will be light refreshments and an opportunity to network with colleagues and Rigmarine personnel.

BOOK NOW

Venue: Crescent Beach Hotel
15th November, 0900 to 1200

To reserve your place, please contact Esmira on:
